Design and Manufacturing

Hoover Ferguson has extensive experience with design of all types of CCU's and bespoke containers. Our experienced design teams can offer tailored solutions for any container need.

- 2D and 3D Drawings
- 3D Modelling
- Extensive drawing and type approval library
- Structural engineering

Potential Dropped Objects

DNV 2.7-1, Section 4.4.6: Fork lift pockets, Guidance note 2: *'reduce the risk of items being retained in the pockets which could subsequently fall out during lifting operations'*.

Donated examples:

Quayside - Rubble found in the Forklift Pockets

- Rubble found in the Forklift Pockets.

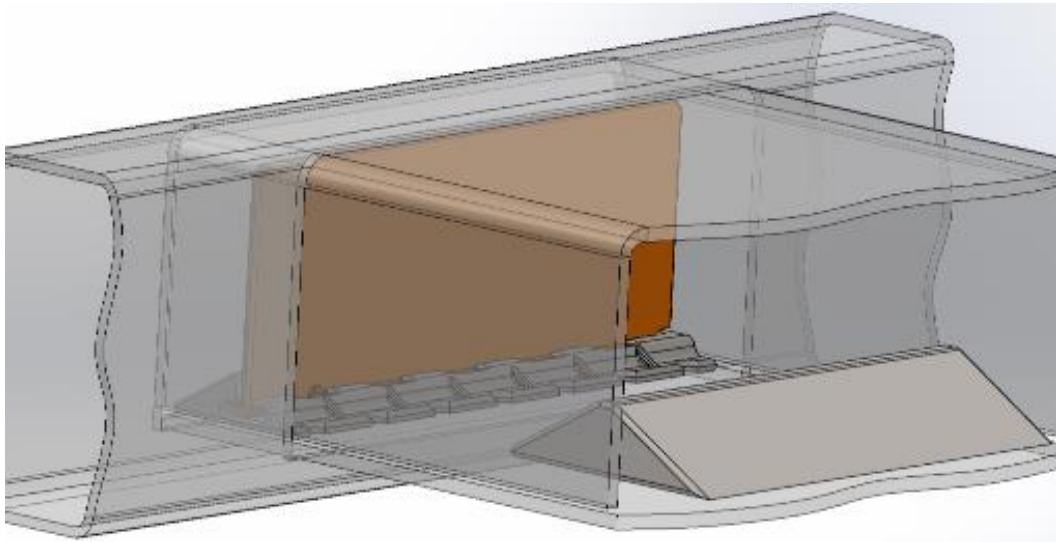

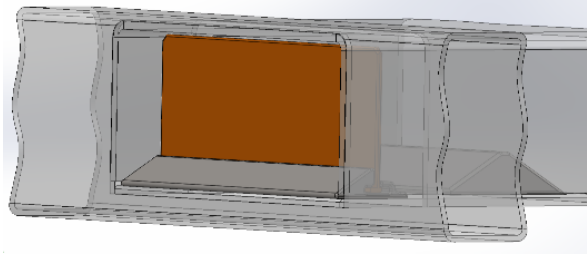

Causes:

1. Poor storage facility
2. Failure to check loads prior to despatch.

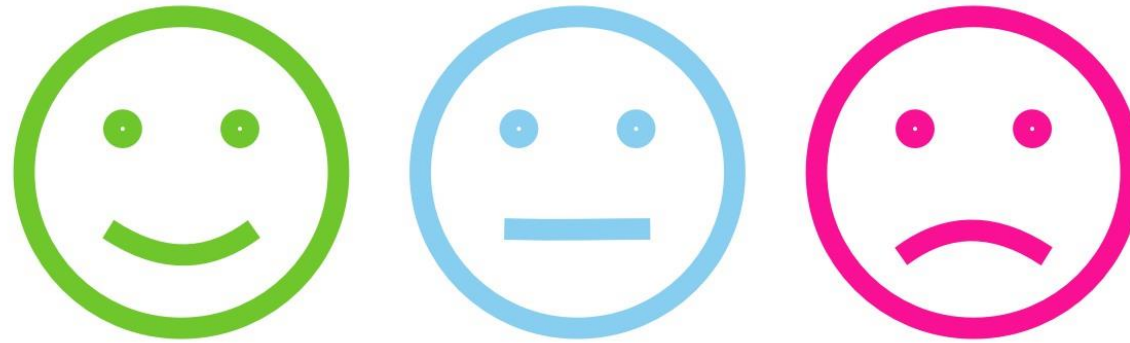

Forklift Pocket Protector

- Flap resists potential dropped objects entering and exiting the pocket.
- Sloped front edge prevents tools being left inside the pocket.
- Iridescent flap illuminates pocket in low light conditions.
- Flap is field replaceable.
- Approved by DNV and Lloyds Register.
- Limited testing to date.

Forklift Pocket Protector
