

# DROPS Surveys

The logo for 'trac' is a black diamond shape with the word 'trac' written in yellow lowercase letters inside.

Dropped objects present a serious safety risk to personnel and equipment. Potential dropped objects can take various forms but generally fall into the following categories:

Poor housekeeping,

Inadequately secured items,

Damaged, corroded or poorly maintained equipment

# DROPS Surveys

**trac**

TRAC Oil & Gas identified to some localised trending whilst recording observation cards submitted from teams. This being PDO's and potential requirement to re-educate.

Subsequently tasked with conducting DROPS survey of all at height locations.

Identify better means of capturing tools whilst working at height

- Tools aloft register
- Accountability
- Traceability
- Educate                  Educate                  Educate

# DROPS Surveys

trac

TRAC have deployed tool chests to various assets and have to date lost one screw driver since date of introduction.

Pre-access all routes in and out are subject to a DROPS assessment.

Sample of Project Managers and Supervisors are DROPS trained

## **HOWEVER**

Problem still exists in having old loose items returned.
