

BRACE YOURSELF WINTER IS COMING

FOR YARD, SITE AND BASES

For yard, site and bases identify high-risk areas due to storms, heavy snow load etc

Begin snow removal before it is critical and use knowledgeable, experienced personnel

On rooftops do not remove snow all the way down to roof covering and use plastic shovels rather than metal

Ensure adequate lighting for accessways, walkways, loading areas, yards, car parks etc

Keep a sufficient supply of rock salt / grit and designate personnel for snow / ice clearing
