# SECURING EQUIPMENT

During adverse / extreme weather, additional precautions are necessary for securing equipment

Establish specific routines for inspection before, during and after adverse weather

Carry out extra checks on securing devices and secondary retention

Check windsocks, wind sensors, floodlights, antennas, antenna masts and scaffolding

Check for any loose objects on roofs, load carriers, in storage areas and ensure lids on storage boxes are secured

**DROPS**  
DROPPED OBJECTS  
PREVENTION SCHEME

CHOOSE YOUR FUTURE MAKE A **DIFFERENCE**
